JOB DESCRIPTION

JOB TITLE:	Scrum Master
LOCATION:	WFH
Description	As a premier energy infrastructure company serving 36 million consumers in North America, our Client embraces its role as a leader in advancing a net-zero future. With them, you can help shape a better future for our communities and our planet, alongside a workforce of 19,000 talented teammates. The company is consistently recognized for its sustainable business practices and long-standing commitment to building a high-performing culture focused on safety, workforce development and training, and diversity and inclusion. Client is the only North American utility sector company included on the Dow Jones Sustainability World Index and was also named one of the "World's Most Admired Companies" for 2021 by Fortune Magazine. Join us as we collaborate in providing cleaner, safer and more reliable energy to our customers and communities. Immediate interviews available for skilled Scrum Masters in the Philippines! As a Scrum Master, you will be collaborating with the Agility Management team to ensure approach and uniformity across the company whilst building a trusting environment as trusted advisor and help the team identify impediments and discover ways to manage dependencies and blockers. Following an agile methodology, you'll facilitate agile ceremonies and workshops, capture end of sprint metrics and milestones, coach on agility values and principles and coaching teams on best practice to support backlog management and customer value through iterative delivery. You will prepare project updates and work breakdown structures and able to deliver effective communication and influence at all levels. You'll maintain a comprehensive knowledge of business challenges, requirements, and goals as well as keeping abreast of IT digital technologies and platforms to assist project delivery. This role is long term, permanent work from home working model and is for a recognisable and reputable brand.

Qualifications and Requirements	• Must at least have 3 years of working as Scrum Master.
	• Experience in Utility industry an advantage.
	• Evidence of delivering quality agile projects designed to provide best business value.
	• Requires skill on the following:
	   - Scrum and SAFe methodologies;
	   - digital product management;
	   - communication, collaboration and project management skills
