

<b>JOB TITLE:</b>	<b>AWS Fullstack (Frontend) React, Typescript, and NodeJS Developer</b>
<b>LOCATION:</b>	<b>Remote</b>
<b>Summary</b>	We are seeking a Fullstack (Frontend) Developer with strong skills in React, Typescript, and NodeJS, coupled with essential AWS infrastructure knowledge. This role requires a deep understanding of UI development, including HTML, CSS, JavaScript, HTTP methods, and browser behavior. Proficiency in Git is a must.
<b>Responsibilities</b>	<ul style="list-style-type: none"><li>• Contribute to security and identity management aspects of the software.</li><li>• Develop and maintain frontend applications using Node.js and modern JavaScript frameworks such as Angular (v2 and above) or React with a strong emphasis on React. Implement UI components, manage state using Redux, and ensure a visually appealing and responsive user interface with good CSS skills.</li><li>• Collaborate with cross-functional teams to gather requirements and implement backend functionality, including API integrations using SOAP and REST.</li><li>• Utilize AWS services and technologies such as S3, EC2, CloudFront, Elastic Beanstalk, RDS, DynamoDB, Lambda, load balancing, autoscaling, and serverless architectures. Gain a basic understanding of serverless computing and cloud infrastructure management.</li><li>• Apply DevOps principles and practices by managing CI/CD pipeline workflows and deployment tooling. Develop automation scripts using Bash or Python for tasks such as generating build artifacts and deploying applications.</li><li>• Collaborate with team members, participate in code reviews, and contribute to the overall software development lifecycle. Stay updated with industry trends and technologies to propose innovative solutions and enhance the development process.</li></ul>
<b>Qualifications</b>	<ul style="list-style-type: none"><li>• Proficiency in React, Typescript, and NodeJS.</li><li>• Strong UI skills with HTML, CSS, JavaScript, and browser behavior.</li><li>• Extensive experience with Git.</li><li>• Solid grasp of API integration.</li><li>• Experience with serverless cloud native development using AWS services like S3, AWS Lambda, API Gateway, Cloudfront CDN, Cognito, and RDS.</li><li>• Previous experience deploying applications using build pipelines in a CI/CD Agile environment.</li></ul>
<b>Nice to Have</b>	<ul style="list-style-type: none"><li>• SQL experience.</li><li>• Backend API design knowledge.</li><li>• Familiarity with SQLite and Terraform.</li><li>• Some networking expertise in DNS, SSL, SAML, and certificates.</li><li>• Experience with mobile development.</li></ul>
