

JOB DESCRIPTION

JOB TITLE:	Senior Data Scientist
LOCATION:	PH Remote
WORK HOURS:	Mid-Shift or Night-Shift
Summary	<p>We are seeking a Senior Data Scientist to join our team on a contract basis. In this role, you will focus on data extraction and AI/ML-driven reporting to deliver actionable insights and support decision-making. Preference will be given to candidates with strong experience in AI technologies. The initial engagement is for a duration of 4-6 months exclusively; however, this initiative represents the first phase of a long-term strategic partnership. Selected candidates will join a dedicated pilot team tasked with developing and deploying automation solutions for a Fortune 500 enterprise. The client's objective is to implement AI-driven capabilities across their application ecosystem as part of a broader digital transformation agenda.</p>
Responsibilities	<ul style="list-style-type: none"> • Perform data extraction from diverse sources and ensure data quality. • Develop and implement AI/ML-based reporting systems to generate insights and automate reporting processes. • Collaborate with cross-functional teams to deliver scalable and efficient data solutions.
Qualifications	<ul style="list-style-type: none"> • Proven experience as a Data Scientist with expertise in AI/ML techniques. • Proficiency in programming languages (Python, SQL, etc.) and tools (e.g., TensorFlow, PyTorch). • Strong understanding of data extraction, machine learning, and reporting systems. • Experience with AI technologies is a strong preference. • Ability to work independently and deliver results in a fast-paced environment.
